

GIOVANY EMANUEL DOMÍNGUEZ PONCE

Information Technology Engineer

emanuel.dominguez.075@gmail.com 4432138396 Lagunillas, Michoacan, Mexico

TECHNICAL SKILLS

- RESTful API Design
- Data Modeling & Transactions
- PHP / Laravel / CodeIgniter 4
- JavaScript / TypeScript
- PostgreSQL / MySQL
- Query Optimization
- Validation, Error Handling & Security
- Testing (Pest / PHPUnit)
- Docker
- Git / GitHub
- Linux / Advanced Terminal
- AI Tools (Claude Code, Copilot)

LANGUAGES

Spanish — Native
English — Advanced (B2)

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Teamwork
- Effective Communication
- Adaptability
- Self-learning
- Time Management
- Proactivity

CERTIFICATIONS

SQL (Intermediate)
HackerRank · 2024

Google Cloud Computing Foundations
Credly · 2024

PROFESSIONAL SUMMARY

Backend developer with 3+ years of experience designing, building and maintaining server-side web applications. Strong foundations in RESTful API architecture, relational data modeling, query optimization, validation, error handling and security. Experienced in applying separation of concerns, data persistence and design patterns across ERP systems and government platforms. I integrate AI tools (Claude Code, GitHub Copilot) to support analysis, development and documentation while maintaining full control over the final output.

WORK EXPERIENCE

Backend Developer

Bloomingtec | *10/2025 – Present*
Chilchota, Michoacan (Remote) · Agribusiness startup

- Design and development of backend services for the ERP system using Laravel and PostgreSQL, applying separation of concerns and design patterns.
- Design and implementation of RESTful APIs with data validation, error handling and access control.
- Relational data modeling: table design, relationships, indexes and transactions to ensure data integrity and performance.
- Query optimization and resolution of database performance issues.
- Migration of legacy features to modern architectures, assessing risks and solution alternatives.
- VPS server (Linux) administration for development and production environments.
- Use of AI tools (Claude Code, GitHub Copilot) to support analysis, development and documentation while maintaining control over the output.

Backend Developer

Lagunillas City Government | *08/2023 – 02/2026*
Lagunillas, Michoacan · Municipal government

- Backend development of modules and features for the institutional ERP platform using CodeIgniter 4 and MySQL.
- Backend architecture design for modules, defining controller structure, models, routes and business logic.
- Data model design, relationships and optimized queries for government processes.
- Requirements analysis with municipal departments, identifying ambiguities and translating needs into technical specifications.
- VPS server administration for hosting institutional web applications.

Field IT Engineer

Medical Minds | *06/2022 – 06/2023*
Morelia, Michoacan · IT Consulting

- Server administration and database management for the clinical management platform.
- Network infrastructure configuration and cloud services support.
- Diagnosis and resolution of technology infrastructure incidents.

EDUCATION

B.S. in Information and Communications Technology Engineering

Instituto Tecnológico Superior de Pátzcuaro | 08/2015 – 04/2022

RECENT PROJECTS

WISP (Wireless Internet Service Provider)

Own venture | 02/2025 – Present

- Development of a proprietary web platform for client management, payments and service tracking.
- Network administration with Mikrotik (RouterOS) and radio link configuration.
- On-site diagnosis and resolution of connectivity issues.
